INTERNATIONAL STANDARD

Ref. No. ISO 155-1975 (E)

FOREWORD

ISO (the International Organization for Standardization) is a worldwide federation of national standards institutes (ISO Member Bodies). The work of developing International Standards is carried out through ISO Technical Committees. Every Member Body interested in a subject for which a Technical Committee has been set up has the right to be represented on that Committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work.

Draft International Standards adopted by the Technical Committees are circulated to the Member Bodies for approval before their acceptance as International Standards by the ISO Council.

Prior to 1972, the results of the work of the Technical Committees were published as ISO Recommendations; these documents are now in the process of being transformed into International Standards. As part of this process, Technical Committee ISO/TC 41 has reviewed ISO Recommendation R 155 and found it technically suitable for transformation. International Standard ISO 155 therefore replaces ISO Recommendation R 155-1960 to which it is technically identical.

ISO Recommendation R 155 was approved by the Member Bodies of the following countries:

Spain Austria Israel Belgium Italy Sweden Chile Japan Switzerland Czechoslovakia New Zealand United Kingdom Finland Norway U.S.A. France Romania U.S.S.R. Germany South Africa, Rep. of

The Member Bodies of the following countries expressed disapproval of the Recommendation on technical grounds:

Denmark* India*

No Member Body disapproved the transformation of ISO/R 155 into an International Standard.

Printed in Switzerland

Subsequently, this Member Body approved the Recommendation.
