BRIEF HISTORY

The ISO Recommendation R 1073, *Alphanumeric character sets for optical recognition*, was drawn up by Technical Committee ISO/TC 97, *Computers and information processing*, the Secretariat of which is held by the American National Standards Institute, Inc. (ANSI).

Work on this question led, in 1965, to the adoption of a Draft ISO Recommendation.

In July 1967, this Draft ISO Recommendation (No. 996) was circulated to all the ISO Member Bodies for enquiry. It was approved, subject to a few modifications of an editorial nature, by the following Member Bodies :

Australia	Ireland	Sweden
Belgium	Israel	Switzerland
Canada	Italy	Turkey
Czechoslovakia	Japan	U.A.R.
Denmark	Netherlands	United Kingdom
France	New Zealand	U.S.A.
Iran	Spain	U.S.S.R.

One Member Body opposed the approval of the Draft :

Germany

The Draft ISO Recommendation was then submitted by correspondence to the ISO Council, which decided, in May 1969, to accept it as an ISO RECOMMENDATION.

HISTORIQUE

La Recommandation ISO/R 1073, *Jeux alphanumériques de caractères pour la reconnaissance optique*, a été élaborée par le Comité Technique ISO/TC 97, *Calculateurs et traitement de l'information*, dont le Secrétariat est assuré par le American National Standards Institute, Inc. (ANSI).

Les travaux relatifs à cette question aboutirent, en 1965, à l'adoption d'un Projet de Recommandation ISO.

En juillet 1967, ce Projet de Recommandation ISO (N° 996) fut soumis à l'enquête de tous les Comités Membres de l'ISO. Il fut approuvé, sous réserve de quelques modifications d'ordre rédactionnel, par les Comités Membres suivants :

Australie	Irlande	Royaume-Uni
Belgique	Israël	Suède
Canada	Italie	Suisse
Danemark	Japon	Tchécoslovaquie
Espagne	Nouvelle-Zélande	Turquie
France	Pays-Bas	U.R.S.S.
Iran	R.A.U.	U.S.A.

Un Comité Membre se déclara opposé à l'approbation du Projet :

Allemagne

Le Projet de Recommandation ISO fut alors soumis par correspondance au Conseil de l'ISO qui décida, en mai 1969, de l'accepter comme RECOMMANDATION ISO.

FOREWORD

This ISO Recommendation specifies the nominal printed images of two character sets, OCR-A and OCR-B, for use in optical recognition systems. The printed images are specified since they represent the information produced by the printer and processed by optical readers as well as by people.

To facilitate its use, the ISO Recommendation is presented in three parts.

Part I specifies the standard sizes and repertoires of the two character sets, together with the special use of some of the characters. Illustrations of each character in the two sets are provided for general information; they are approximately 30 : 1, 5 : 1 and 1 : 1 representations of size I.

Part II specifies the nominal printed image of each character in character set OCR-B. Sizes I and II are specified with variable strokewidth for letterpress printing and with constant strokewidth for any type of printing. Size III is specified with constant strokewidth only. All drawings and numerical dimensions necessary for establishing the nominal printed images of OCR-B are given in this Part.

Part III specifies the nominal printed image of each character in character set OCR-A. Sizes I, II, III and IV are specified with constant strokewidth. All drawings and numerical dimensions necessary for establishing the nominal printed images of OCR-A are given in this Part.

Part I is intended to provide, for both OCR-A and OCR-B, the general information required by users, system designers and other interested groups. It may be used independently for this purpose.

Parts I and II are both necessary to provide the information on OCR-B required by manufacturers of printing or reading devices and by type manufacturers.

Parts I and III are both necessary to provide the information on OCR-A required by manufacturers of printing or reading devices and by type manufacturers.

This ISO Recommendation specifies the nominal printed images. Additional Recommendations will enlarge upon the acceptable print quality requirements and the relevant format characteristics needed to satisfy OCR interchange requirements. These Recommendations are now in course of preparation and will not modify the present Recommendation but will make its implementation easier.

Parts I and III of this ISO Recommendation include the "OCR-A numeric subset" in its entirety.

Size IV for OCR-B is technically feasible and can be made available when the need arises.

Attention is called to the fact that, since this ISO Recommendation specifies the nominal *printed* images, the type should not be cut to these dimensions. The type dimensions should be deduced from those of the nominal printed images after due correction for the systematic effects in the printing process.

AVANT-PROPOS

La présente Recommandation ISO définit les images imprimées nominales des deux jeux de caractères ROC-A et ROC-B pour la reconnaissance optique. On définit les images imprimées car elles représentent l'information produite par le dispositif imprimant et lue tant par la machine lectrice que par l'œil humain.

Afin d'en rendre l'usage plus aisé, cette Recommandation ISO comprend trois parties.

La *Première partie* définit les dimensions normalisées et les répertoires des deux jeux de caractères, ainsi que l'usage particulier de certains caractères. Chaque caractère des deux jeux est représenté, à titre d'information générale, approximativement aux échelles 30 : 1, 5 : 1 et 1 : 1 en dimension I.

La *Deuxième partie* définit l'image imprimée nominale de chaque caractère du jeu ROC-B. Les dimensions I et II sont indiquées avec des variations d'épaisseur de trait pour les caractères d'imprimerie et avec une épaisseur de trait constante pour tout autre dispositif d'impression. La dimension III n'est indiquée qu'avec une épaisseur de trait constante. Toutes les planches et tous les tableaux de valeurs nécessaires pour définir exactement l'image imprimée nominale des caractères ROC-B sont donnés dans cette Deuxième partie.

La *Troisième partie* définit l'image imprimée nominale de chaque caractère du jeu ROC-A. Les dimensions I, II, III et IV sont indiquées avec une épaisseur de trait constante. Toutes les planches et tous les tableaux de valeurs nécessaires pour définir exactement l'image imprimée nominale des caractères ROC-A sont donnés dans cette Troisième partie.

Le but de la Première partie est de donner, pour les jeux ROC-A et ROC-B, des informations générales aux utilisateurs, aux analystes et aux autres groupes intéressés. Elle peut être employée seule à cet effet.

La Première et la Deuxième partie sont, quant au jeu ROC-B, toutes deux indispensables aux fabricants de dispositifs d'impression ou de lecture ainsi qu'aux fabricants de caractères d'imprimerie.

La Première et la Troisième partie sont, quant au ROC-A, toutes deux indispensables aux fabricants de dispositifs d'impression ou de lecture ainsi qu'aux fabricants de caractères d'imprimerie.

La présente Recommandation ISO définit les images imprimées nominales. D'autres Recommandations indiqueront ce qui constitue une qualité d'impression acceptable ainsi que les règles de mise en page, le tout définissant alors les règles pour l'échange satisfaisant de documents destinés à la reconnaissance optique. Ces Recommandations sont en cours d'élaboration, elles ne modifieront pas la présente Recommandation ISO, elles rendront au contraire sa mise en œuvre plus aisée.

La dimension IV, pour le jeu ROC-B, est aisément réalisable et sera mise à disposition si besoin s'en fait sentir.

La présente Recommandation ISO définissant les images imprimées nominales, les caractères d'impression ne sauraient être produits selon ces dimensions. Les dimensions exactes de ces caractères doivent être déduites de celles des images imprimées en tenant compte des effets systématiques de déformation au cours du processus d'impression.

ALPHANUMERIC CHARACTER SETS FOR OPTICAL RECOGNITION

PART I

STANDARD SIZES AND REPERTOIRES OF CHARACTER SETS OCR-A AND OCR-B

1. GENERAL

1.1 Purpose

This ISO Recommendation for standard character shapes and sizes is intended to facilitate and foster the use of Optical Character Recognition (OCR) in data processing, by defining character shapes suitable for both human and machine reading.

It establishes a common basis for printing equipment and optical scanning equipment for OCR interchange applications.

Additional ISO Recommendations will cover the print quality and the relevant characteristics of the formats needed to satisfy interchange requirements.

1.2 Scope

This ISO Recommendation specifies the printed image shapes and sizes of alphanumeric characters, graphics and symbols designed for use in Optical Character Recognition. They are also suitable for general purposes.

In order to satisfy present requirements and encourage the wide extension of OCR applications, two sets of characters are specified. These are named OCR-A and OCR-B.

Character set OCR-A includes the numeric subset which was recommended in Draft ISO Recommendation No. 890 (now part of this ISO Recommendation). There are no plans for the addition of a lower case alphabet. The shapes of the characters have been designed to be suitable for use in many applications of OCR. Dimensions of OCR-A are given in four sizes.

The shapes of the OCR-B characters have been designed for use in OCR systems without undue sacrifice of their suitability for general purposes in a wide range of applications. Dimensions of OCR-B are given in three sizes. A fourth size is technically feasible and can be made available.

JEUX ALPHANUMÉRIQUES DE CARACTÈRES POUR LA RECONNAISSANCE OPTIQUE

PREMIÈRE PARTIE

DIMENSIONS NORMALISÉES ET RÉPERTOIRES DES JEUX DE CARACTÈRES ROC-A ET ROC-B

1. GÉNÉRALITÉS

1.1 Objet

La présente Recommandation ISO spécifiant les formes et les dimensions normalisées a pour objet de faciliter et de stimuler la reconnaissance optique des caractères (ROC) dans le domaine du traitement de l'information en définissant des formes de caractères lisibles tant pour une machine que pour l'œil humain.

Elle établit la référence commune pour les dispositifs d'impression et pour les dispositifs de lecture dans les applications comprenant un échange de documents destinés à la reconnaissance optique.

D'autres Recommandations ISO indiqueront ce qui constitue une qualité d'impression acceptable ainsi que les règles de mise en page, le tout définissant alors les règles nécessaires pour permettre la circulation de documents destinés à la reconnaissance optique.

1.2 Domaine d'application

La présente Recommandation ISO définit les formes des images imprimées et les dimensions des caractères alphanumériques, des signes et des symboles graphiques destinés à la reconnaissance optique, lesquels conviennent également à un emploi plus général.

Afin de satisfaire les besoins présents et d'encourager un usage généralisé de la reconnaissance optique, deux jeux de caractères, appelés ROC-A et ROC-B, ont été définis.

Le jeu de caractère ROC-A comprend le sous-ensemble numérique qui faisait l'objet du Projet de Recommandation ISO N° 890 (qui a été incorporé à la présente Recommandation ISO). Il n'est pas prévu d'ajouter un jeu de minuscules. Les formes de caractères ont été choisies en vue de permettre de nombreuses applications ROC. Quatre dimensions normalisées sont indiquées pour les caractères ROC-A.

Les formes des caractères ROC-B ont été conçues de manière à pouvoir être utilisées par les systèmes ROC sans que leur aptitude à un emploi général dans un large domaine d'applications ne doive être indûment sacrifiée. Les cotes des caractères ROC-B sont données pour les dimensions I, II, III. Une dimension IV est techniquement réalisable et peut être mise à disposition.

1.3 Definitions

For the purpose of this ISO Recommendation the following definitions apply :

OCR-A. A repertoire of 66 characters of which 52 are graphics included in the ISO 7-bit code table (ISO Recommendation R 646, *6 and 7 bit coded character sets for information processing interchange*). It comprises numerals, upper case alphabet, upper case national letters and other graphics.

OCR-B. A repertoire of 113 characters comprising numerals, upper and lower case alphabet, all the graphics specified in the ISO 7-bit code table (ISO Recommendation R 646), national letters, diacritical signs and further graphics.

Printing frame. The smallest rectangle the sides of which are horizontal and vertical and which includes the centreline shapes of all characters.

Sizes of a repertoire. The sizes specified by the height H and the width W of the relevant printing frame.

Width. The width of the body of a letterpress type.

NOTES

1. Four sets of sizes are specified for OCR-A and three for OCR-B in order to permit the use of the OCR character sets with a wide range of printing equipment with different print quality characteristics. Devices such as typewriters, cash registers, numbering machines, high-speed printers, credit card imprinters and non-impact imprinters, and printing processes such as letterpress and offset, are all involved.
2. For applications which involve circulation of documents across boundaries between areas in which different national characters are in use, agreement between the sender and the recipient of the documents is required.
3. The metric and inch dimensions in this ISO Recommendation are rounded and therefore consistent but not exactly equal. Either system may be used but the two should not be intermixed.
4. It is recognized that some type-making and printing processes will not be able to produce sharp corners. Corners not specified as having a specific radius should be as sharp as practicable. However, it is not necessary for OCR purposes that the radii of the corners of the nominal printed image be less than 0.08 mm (0.0035 in).

1.3 Définitions

Dans le cadre de la présente Recommandation ISO, les définitions suivantes ont été retenues :

ROC-A. Un répertoire de 66 caractères, dont 52 sont des symboles graphiques compris dans le tableau du code ISO à 7 éléments d'information (Recommandation ISO/R 646, *Jeux de caractères codés à 6 et 7 éléments pour l'échange d'information entre matériels de traitement de l'information*). Ce répertoire comprend des chiffres, un alphabet majuscule, des majuscules nationales et d'autres symboles graphiques.

ROC-B. Un répertoire de 113 caractères comprenant des chiffres, un alphabet majuscule et minuscule, tous les symboles graphiques du tableau de code ISO à 7 éléments d'information (Recommandation ISO/R 646), des lettres nationales, des signes diacritiques et des symboles graphiques supplémentaires.

Cadre d'impression. Le plus petit rectangle de côtés horizontaux et verticaux contenant les formes des lignes médianes de tous les caractères.

Dimensions d'un répertoire. Les dimensions définies par la hauteur H et la largeur W du cadre d'impression donné.

Chasse. La largeur du caractère d'imprimerie.

NOTES

1. Quatre dimensions ont été définies pour le jeu de caractères ROC-A et trois pour le jeu de caractères ROC-B afin de permettre l'utilisation des caractères ROC avec une grande variété de dispositifs d'impression ayant des caractéristiques qualitatives différentes. Sont inclus : les machines à écrire, les caisses enregistreuses, les machines à numérotter, les imprimantes rapides, les machines à marquer utilisant les cartes de crédit, les imprimantes sans percussion ainsi que les procédés classiques tels que l'imprimerie et l'offset.
2. Les applications requérant une circulation de documents de part et d'autre des frontières entre pays dans lesquels des lettres nationales différentes sont en usage doivent faire l'objet d'arrangements particuliers entre les parties concernées.
3. Les cotes, données en millimètres et en inches dans la présente Recommandation ISO, sont arrondies et, par conséquent, équivalentes et non égales. On utilisera donc exclusivement l'un ou l'autre système.
4. Il est admis que certains procédés de fabrication des caractères et certains procédés d'impression ne peuvent produire d'angles vifs. Les angles pour lesquels aucun rayon n'a été indiqué devraient être aussi vifs que possible. Pour les besoins de la ROC, il n'est toutefois pas nécessaire que les rayons des angles de l'image imprimée soient plus petits que 0,08 mm (0,0035 in).

2. CHARACTER SET OCR-A

2.1 Name

The name of the character set is OCR-A.

2.2 OCR-A sizes

Table 1 below specifies the dimensions of the printing frame (W , H) of the total repertoire in four sizes. It also indicates the nominal strokewidth T and the minimum length L of the long vertical mark ($14 H/9$). The maximum length of the vertical mark is not specified as there is no intention of restricting it.

TABLE 1 – OCR-A printing frame dimensions

Size	millimetres				inches			
	W	H	T	L	W	H	T	L
I	1.40	2.40	0.35	3.73	0.055	0.094	0.014	0.146
II	1.40	2.84	0.35	4.42	0.055	0.112	0.014	0.174
III	1.52	3.20	0.38	4.98	0.060	0.126	0.015	0.196
IV	2.04	3.80	0.51	5.91	0.080	0.150	0.020	0.233

2.3 OCR-A repertoire

2.3.1 The 66 characters of the OCR-A repertoire are as follows :

10 numerals 0 to 9

26 upper case letters A to Z

16 graphics

2.4 Use of characters

2.4.1 *Letter Y and symbol for* . It is recommended that the letter Y and the abstract symbol for *fork*  should not both be used in the same application.

2.4.2 *OCR-A numeric subset*. For applications requiring numeric reading only, it is suggested that the numeric subset (see clause 2.3.2 and Part III) be used.

2.5 Illustrations

The illustrations of the repertoire on the following pages are presented for general information only; they are representations of size I of OCR-A at scales 1 : 1, 5 : 1 and 30 : 1 approximately.

STANDARDSISO.COM : Click to view the full PDF of ISO/R 1073-1969

2.4 Emploi des caractères

2.4.1 *Lettre Y et symbole* Υ . Il est recommandé de ne pas employer la lettre Y et le symbole Υ (fourchette) dans une même application.

2.4.2 *Sous-ensemble numérique du répertoire ROC-A*. Dans les applications ne requérant que la lecture de chiffres, le sous-ensemble numérique (voir paragraphe 2.3.2 et Quatrième partie) peut être utilisé avantageusement.

2.5 Illustrations

Les illustrations du répertoire figurant sur les pages suivantes sont données à titre d'information générale seulement. Elles représentent le jeu ROC-A en dimension I approximativement aux échelles 1 : 1, 5 : 1, et 30 : 1.

3. CHARACTER SET OCR-B

3.1 Name

The name of the character set is OCR-B.

3.2 General considerations

Two sets of characters are provided, one entitled "letterpress font" for printing equipment with accurate control of the printed image, and the other "constant strokewidth font" for printing equipment without such accurate control.

The strokewidths of the letterpress characters are varied deliberately for aesthetic reasons; on the other hand, the strokewidths from many classes of printers vary at random in the printing process. Since the strokewidths cannot always be controlled, the definitive part of the Recommendation is the centreline shapes. Accordingly, for each size the dimensions have been specified to make the centreline shapes the same for both letterpress and constant strokewidth fonts. Moreover, the centreline shapes for all sizes are simply related by appropriate horizontal and vertical scale changes.

This scale relationship does not apply to the outline shapes since nominal strokewidth is not strictly proportional to the various sizes.

The letterpress font is specified in two sizes (size I and II). The constant strokewidth font is specified in three sizes (size I, II and III).

3.3 OCR-B sizes

3.3.1 Printing frame dimensions

The character set may be printed in three sizes defined by the dimensions (W , H) of the printing frame of the initial repertoire (3.4 (a)). In the initial repertoire the printing frame is determined by the centrelines of the characters 8 and M.

TABLE 2 — OCR-B printing frame dimensions

Size	millimetres		inches	
	W	H	W	H
I	1.40	2.40	0.055	0.094
II	1.40	2.80	0.055	0.110
III	1.52	3.20	0.060	0.126

For each size (I, II and III) the dimensions of all other graphics in the total repertoire are proportional to the size of the initial repertoire.

3. JEU DE CARACTÈRES ROC-B

3.1 Nom

Le nom du jeu de caractères est ROC-B.

3.2 Considérations générales

Le jeu de caractères comprend deux versions, l'une appelée "caractères d'imprimerie" et l'autre appelée "caractères à épaisseur de trait constante". La première est prévue pour les dispositifs d'impression permettant un contrôle très précis de l'image imprimée, le second pour les dispositifs dépourvus d'une telle possibilité.

L'épaisseur du trait des caractères d'imprimerie présente des variations voulues pour des raisons esthétiques. Cependant, dans de nombreux dispositifs d'impression, l'épaisseur du trait est soumise à des variations incontrôlables au cours du processus d'impression. Etant donné que l'épaisseur du trait ne peut pas toujours être obtenue avec exactitude, la présente Recommandation ISO donne, comme référence, la forme des lignes médianes. Ainsi, pour chaque dimension des caractères les cotes des lignes médianes ont été indiquées de manière que celles-ci soient les mêmes pour les caractères d'imprimerie et pour les caractères à épaisseur de trait constante. Les formes des lignes médianes pour les trois dimensions peuvent être obtenues les unes des autres par un changement d'échelle vertical et horizontal.

Ces changements d'échelle ne sont pas applicables au contour des caractères, car les valeurs nominales de l'épaisseur du trait ne sont pas exactement proportionnelles aux dimensions.

Le caractère d'impression est défini pour deux dimensions (I et II), le caractère à épaisseur de trait constante l'est pour les trois dimensions (I, II et III).

3.3 Dimensions des caractères ROC-B

3.3.1 Cotes du cadre d'impression

Le caractère ROC-B peut être imprimé en trois cotes définies par les cotes (W et H) du cadre d'impression du répertoire initial (3.4 (a)). Dans ce dernier, le cadre d'impression est défini par les lignes médianes des caractères M et 8.

TABLEAU 2 – Cotes du cadre d'impression ROC-B

Dimension	millimètres		inches	
	W	H	W	H
I	1,40	2,40	0,055	0,094
II	1,40	2,80	0,055	0,110
III	1,52	3,20	0,060	0,126

Pour chaque dimension (I, II et III) les cotes de tous les autres symboles graphiques sont proportionnelles à celles du répertoire initial.

3.3.2 Typical dimensions of the nominal printed images

(a) CONSTANT STROKEWIDTH FONT

Typical dimensions of the nominal printed image of the constant strokewidth font, sizes I, II and III, are given in Table 3. These dimensions are the heights above and below the horizontal base line of numerals, lower and upper case letters, ascenders and descenders (see Fig. 1, page 64). These dimensions are for general information only. The precise values for individual characters are specified in Part II.

TABLE 3 – Typical dimensions :
Nominal printed image of constant strokewidth font

Size	millimetres				inches			
	A	B	C	D	A	B	C	D
I	2.713	2.502	1.860	0.628	0.1068	0.0985	0.0732	0.0247
II	3.110	2.863	2.118	0.733	0.1224	0.1127	0.0834	0.0289
III	3.575	3.292	2.443	0.800	0.1407	0.1296	0.0962	0.0315

(b) LETTERPRESS FONT

Typical dimensions for the nominal printed image of the letterpress font, sizes I and II, are given in Table 4. These dimensions are the heights above and below the horizontal base line of numerals, lower and upper case letters, ascenders and descenders (see Fig. 1, page 64). These dimensions are for general information only. The precise values for individual characters are specified in Part II.

3.3.2 Cotes caractéristiques des images imprimées nominales

a) CARACTÈRES À ÉPAISSEUR DE TRAIT CONSTANTE

Le Tableau 3 donne les cotes caractéristiques de l'image imprimée nominale du caractère à épaisseur de trait constante pour les dimensions I, II et III. Ce sont les hauteurs au-dessus et au-dessous de la ligne de base des chiffres, des lettres majuscules et minuscules, des longues du haut et des longues du bas (voir Fig. 1, page 65). Ces cotes sont données à titre d'information seulement. Les valeurs exactes sont indiquées dans la Deuxième partie.

TABLEAU 3 – Cotes caractéristiques de l'image imprimée nominale
du caractère à épaisseur de trait constante

Dimension	millimètres				inches			
	A	B	C	D	A	B	C	D
I	2,713	2,502	1,860	0,628	0,1068	0,0985	0,0732	0,0247
II	3,110	2,863	2,118	0,733	0,1224	0,1127	0,0834	0,0289
III	3,575	3,292	2,443	0,800	0,1407	0,1296	0,0962	0,0315

b) CARACTÈRE D'IMPRIMERIE

Les cotes caractéristiques du caractère d'imprimerie sont données dans le Tableau 4 pour les dimensions I et II. Ce sont les hauteurs au-dessus et au-dessous de la ligne de base des chiffres, des lettres majuscules et minuscules, des longues du haut et des longues du bas (voir Fig. 1, page 65). Ces cotes sont données à titre d'information seulement. Les valeurs exactes sont indiquées dans la Deuxième partie.

TABLE 4 – Typical dimensions :
Nominal printed image of letterpress font

Size	millimetres				inches			
	<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>	<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>
I	2.659	2.460	1.838	0.599	0.1047	0.0969	0.0724	0.0236
II	3.049	2.817	2.092	0.699	0.1200	0.1109	0.0824	0.0275

FIG. 1 – Location of dimensions *A*, *B*, *C* and *D*

3.4 OCR-B repertoire

The 113 characters of the total repertoire as follows :

(a) *The initial repertoire*

10 numerals 0 to 9

26 upper case letters A to Z

6 graphics

* Asterisk

+ Plus

, Comma

- Hyphen, Minus sign

. Full stop (period)

/ Solidus

The above 42 characters represent a subset of the total repertoire called *the initial repertoire*.

TABLEAU 4 – Cotes caractéristiques de l'image imprimée nominale
du caractère d'impression

Dimension	millimètres				inches			
	<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>	<i>A</i>	<i>B</i>	<i>C</i>	<i>D</i>
I	2,659	2,460	1,838	0,599	0,1047	0,0969	0,0724	0,0236
II	3,049	2,817	2,092	0,699	0,1200	0,1109	0,0824	0,0275

FIG. 1 – Cotes *A*, *B*, *C* et *D*

3.4 Répertoire des caractères ROC-B

Les 113 caractères du répertoire total sont les suivants :

a) Répertoire initial

10 chiffres 0 à 9

26 lettres majuscules A à Z

6 symboles graphiques

* Astérisque

+ Plus

, Virgule

- Trait d'union, signe moins

. Point

/ Barre oblique

Ces 42 caractères forment un sous-ensemble du répertoire total appelé *répertoire initial*.

(b) *The extended repertoire*

26 lower case letters	a to z
1 alternative lower case letter	m
21 graphics	
	Space (non-printing)
	! Exclamation mark
	# Number sign
	\$ Dollar
	% Per cent
	& Ampersand
	' Apostrophe
	(Left parenthesis
	) Right parenthesis
	: Colon
	; Semicolon
	< Less than
	= Equals
	> Greater than
	? Question mark
	[Left square bracket
	£ Pound
	] Right square bracket
	" Quotation mark, Diaeresis
	— Underline
	@ Commercial at
2 diacritical signs	` Grave accent
	^ Circumflex accent

The above 50 characters together with the former 42 characters represent a subset of the total repertoire called the *extended repertoire*. The extended repertoire includes all the graphics specified in the ISO 7-bit code table (ISO Recommendation R 646).

b) *Répertoire étendu*

26 lettres minuscules	a à z
1 deuxième forme pour la lettre	m
21 symboles graphiques	Espace (non-imprimant)
	! Point d'exclamation
	# Numéro
	\$ Dollar
	% Pour cent
	& Perluète
	' Apostrophe
	(Parenthèse gauche
	) Parenthèse droite
	: Deux points
	; Point virgule
	< Inférieur à
	= Egal
	> Supérieur à
	? Point d'interrogation
	[Crochet gauche
	£ Livre
	] Crochet droit
	" Guillemet, tréma
	— souligné
	@ à commercial
2 signes diacritiques	` Accent grave
	^ Accent circonflexe

Ces 50 caractères forment, avec le répertoire initial, un sous-ensemble du répertoire total appelé *répertoire étendu*. Il comprend tous les caractères du tableau du code ISO à 7 éléments d'information (Recommandation ISO/R 646).

(c) *The remainder of the repertoire*

3.5 Use of symbols

Diacritical signs, underline and quotation mark. These eight graphics have been specifically designed and positioned in such a way that they can be used in conjunction with other graphics so as to modify or stress the meaning of the latter graphics.

The relative position of the graphics for such compositions is obtained by superimposing the horizontal and vertical axes of the two graphics concerned. Accented letters and further national letters can be obtained by means of diacritical signs, as shown in Figure 2 (page 70).

3.5 Emploi des symboles

Signes diacritiques, souligné, guillemet. Ces huit caractères ont été conçus et placés dans le cadre d'impression de manière qu'ils puissent être combinés avec d'autres caractères pour modifier ou souligner le sens de ces derniers.

La position relative de chacun de ces huit symboles par rapport aux caractères avec lesquels ils peuvent être combinés est obtenue en superposant leurs axes verticaux et horizontaux. On peut créer des lettres accentuées et d'autres lettres nationales au moyen de signes diacritiques (voir Fig. 2, page 71).

FIG. 2 – Use of diacritical signs

3.6 Alternative “m”

The centreline width W of any graphic in the total repertoire is not greater than that of character M. There is one exception : lower case m has been given a wider alternative which is used for aesthetic reasons with printing devices with variable pitch.

3.7 Illustrations

The illustrations of the repertoire on the following pages show the OCR-B letterpress font characters size I in black on white at scales 1 : 1, 5 : 1 and 30 : 1 approximately.

FIG. 2 — Emploi de signes diacritiques

3.6 Deuxième forme de la lettre “m”

La largeur W du cadre d'impression est donnée par la lettre M pour tout le répertoire total, à une exception près. On a conçu une deuxième forme de “m” dont la largeur est supérieure à celle du M. Ceci pour des raisons esthétiques si le jeu de caractères est utilisé avec des dispositifs d'impression à pas variable.

3.7 Illustrations

Les illustrations du répertoire figurant sur les pages suivantes représentent les caractères d'imprimerie ROC-B, en noir sur blanc, en dimension I, approximativement aux échelles 1 : 1, 5 : 1 et 30 : 1.

PART II

CHARACTER SET OCR-B

FORM AND DIMENSIONS OF THE PRINTED IMAGE

1. SCOPE

Part II of this ISO Recommendation specifies the nominal printed image shapes and dimensions of alphanumeric characters in the character set OCR-B. There are two designs, letterpress font and constant strokewidth font.

2. CHARACTER SHAPES AND DIMENSIONS

The shapes and dimensions of the characters for both the letterpress font and the constant strokewidth font are specified by the coordinate tables and the reference point drawings.

3. USE OF COORDINATE TABLES AND REFERENCE POINT DRAWINGS

3.1 Letterpress font

The nominal printed image of each character is described by a series of points on the character outline, numbered from 101 onwards. Two additional reference points numbered 1 and 3 are provided together with a vertical reference line 2. Reference points 1 and 3 establish the vertical position, the orientation and the set-width. Reference line 2 establishes the horizontal position for printing pitch. All the points are described in a rectangular coordinate system. To avoid negative coordinates the points 1 and 3 are given the positive ordinate $y = 2000$ microns (0.0787 in) and the reference line 2 is given the positive abscissa $x = 2000$ microns (0.0787 in). Two sets of coordinate tables are given, Table 5 in microns (μm) and Table 6 in milli-inches (1/1000 in).

Character outlines are established

- for size I by x_{12} and y_1 ;
- for size II by x_{12} and y_2 .

The x coordinates are the same since the widths of sizes I and II are the same.

The characters of the letterpress font are designed with minor strokewidth variations. However, stroke-widths are always close to the nominal value of 0.35 mm (0.014 in) for numerals and upper case letters, and 0.31 mm (0.012 in) for lower case letters.

DEUXIÈME PARTIE

JEU DE CARACTÈRES ROC-B

FORME ET COTES DE L'IMAGE IMPRIMÉE

1. OBJET

Cette Deuxième partie de la présente Recommandation ISO définit les formes et les cotes des images imprimées nominales des caractères alphanumériques du jeu ROC-B. Ce jeu convient à la lecture par machine et à celle par l'œil humain. Il comprend deux types de caractères : le caractère d'imprimerie et le caractère à épaisseur de trait constante.

2. FORME ET COTES DES CARACTÈRES

La forme et les cotes des caractères des deux types (caractère d'imprimerie et caractère à épaisseur de trait constante) sont définies par les tables de coordonnées et par les points de références.

3. USAGE DES TABLES DE COORDONNÉES ET DES POINTS DE RÉFÉRENCE

3.1 Caractère d'imprimerie

L'image imprimée nominale de chaque caractère est déterminée par une série de points de son pourtour numérotés à partir de 101. Deux points de référence 1 et 3 et une ligne de référence verticale 2 sont également indiqués. Les points 1 et 3 définissent la position verticale, l'orientation et la chasse. La ligne 2 définit la position horizontale pour le pas d'impression. Tous les points sont donnés dans un système de coordonnées orthogonales. Afin d'éviter des coordonnées négatives, les points 1 et 3 ont l'ordonnée positive $y = 2000$ microns (0,0787 in) et la ligne 2 à l'abscisse positive $x = 2000$ microns (0,0787 in). Deux tables de coordonnées sont données, la Table 5 en microns (μm), la Table 6 en milli-inches (1/1000 in).

Le pourtour des caractères est donné

- en dimension I par x_{12} et y_1 ;
- en dimension II par x_{12} et y_2 .

Les abscisses sont donc les mêmes puisque la largeur des dimensions I et II est la même.

Le caractère d'imprimerie présente de petites variations d'épaisseur de trait, mais son épaisseur effective est toujours très proche de sa valeur nominale de 0,35 mm (0,014 in) pour les chiffres et les majuscules et de 0,31 mm (0,012 in) pour les minuscules.

3.2 Constant strokewidth font

The nominal printed image of each character is defined by its centreline and by its nominal strokewidth.

The character centreline is described by a series of points numbered from 11 onwards. Two additional reference points numbered 1 and 3 are provided together with a vertical reference line 2.

Reference points 1 and 3 establish the vertical position, the orientation and the set-width. Reference line 2 establishes the horizontal position for printing pitch. All the points are described in a rectangular coordinate system. To avoid negative coordinates the points 1 and 3 are given the positive ordinate $y = 2000$ microns (0.0787 in) and the reference line 2 is given the positive abscissa $x = 2000$ microns (0.0787 in). Two sets of coordinate tables are given, Table 5 in microns (μm) and Table 6 in milli-inches (1/1000 in).

Character centrelines are established

- for size I by x_{12} and y_1 ;
- for size II by x_{12} and y_2 ;
- for size III by x_3 and y_3 .

The nominal strokewidth is as follows :

- (a) 0.35 mm (0.014 in) for sizes I and II, and 0.38 mm (0.015 in) for size III, for the characters of the initial repertoire and for the following characters :

Ä Ö Å Æ Ø Ü Ñ ↑ ≥ ≤ × ÷ °

- (b) 0.31 mm (0.012 in) for sizes I and II, and 0.34 mm (0.0135 in) for size III, for all the other characters of the total repertoire.

3.3 Accuracy of points

Any individual figure in the coordinate tables is accurate to about ± 2 microns. When interpolating between the coordinate points this possible variation should be taken into account.

3.4 Character location and set-width

The nominal character horizontal and vertical location is indicated by the reference points 1 and 3 and by the reference line 2 as already described above. The set-width is indicated by the reference points 1 and 3.

3.5 Characters with two nominal vertical locations

The “comma” has two different nominal locations; in one location, indicated by two crosses, the comma markedly projects below the reference line. In the other location, indicated by a third cross, it is contained within the printing frame of the initial repertoire.

When necessary “semicolon” may also be positioned inside the printing frame of the initial repertoire. This is achieved by shifting its nominal vertical position by an amount equal to that specified for the “comma”.

3.2 Caractère à épaisseur de trait constante

L'image imprimée de chaque caractère est définie par sa ligne médiane et par la valeur nominale de l'épaisseur de trait.

La ligne médiane est repérable par une série de points numérotés à partir de 11. Deux points de référence 1 et 3 et une ligne de référence verticale 2 sont également indiqués. Les points 1 et 3 définissent la position verticale, l'orientation et la chasse. La ligne 2 définit la position horizontale pour le pas d'impression. Tous les points sont donnés dans un système de coordonnées orthogonales. Afin d'éviter des coordonnées négatives les points 1 et 3 ont l'ordonnée positive $y = 2000$ microns (0,0787 in) et la ligne 2 à l'abscisse positive $x = 2000$ microns (0,0787 in). Deux tables de coordonnées sont données, l'une (Tableau 5) en microns (μm), l'autre (Tableau 6) en milli-inches (1/1000 in).

Les lignes médianes sont données

- en dimension I par x_{12} et y_1 ;
- en dimension II par x_{12} et y_2 ;
- en dimension III par x_3 et y_3 .

La valeur nominale de l'épaisseur de trait est :

- a) 0,35 mm (0,014 in) pour les dimensions I et II et 0,38 mm (0,015 in) pour la dimension III, ceci pour le répertoire initial et pour les caractères suivants :

À Ö Å Æ Ø Ü Ñ ↑ ≥ ≤ × ÷ °

- b) 0,31 mm (0,012 in) pour les dimensions I et II et 0,34 mm (0,0135 in) pour la dimension III, ceci pour tous les autres caractères du répertoire total.

3.3 Précision des valeurs indiquées

Les valeurs données par les tables de coordonnées le sont à ± 2 microns près (0,00005 in). Il y a lieu d'en tenir compte en cas d'interpolation.

3.4 Positionnement et chasse

Les positions nominales horizontales et verticales des caractères sont données par les points 1 et 3 et par la ligne 2. La chasse est indiquée par les points 1 et 3.

3.5 Caractères ayant deux positions verticales

Le caractère "virgule" peut avoir deux positions verticales. Dans l'une, indiquée par deux croix, elle s'étend notablement au-dessous de la ligne de référence. Dans l'autre, indiquée par une troisième croix, elle est à l'intérieur du cadre d'impression.

Le cas échéant le caractère "point virgule" peut également être disposé entièrement dans le cadre d'impression. Sa position verticale doit être, à cet effet, déplacée vers le haut d'une distance égale à celle indiquée pour la virgule.

4. GRID REPRESENTATION OF STROKE POSITIONS

The centreline shapes of the characters have been designed so that all long horizontal and vertical strokes can be fitted on a 14×24 grid in order to facilitate the generation of the characters on certain kinds of printing equipment.

5. GENERAL REMARKS ON PRINTING THE LETTERPRESS AND CONSTANT STROKEWIDTH FONTS

In order to print the letterpress font and to achieve the most satisfactory appearance, the printing device should be able to print sharp corners and to keep the strokewidth variations under close control. These features are not required for printing the constant strokewidth font. There may well be printing equipment in which the accuracy of strokewidth control is intermediate between that required in letterpress quality and that produced by, for example, high-speed printers. It is at the discretion of the manufacturers of such printing equipment to design their type so that the printed images incorporate as many as practicable of the strokewidth variations which contribute to the aesthetically satisfactory appearance of the letterpress character shapes.

Care should be taken that the printed image strokes are symmetrically distributed around the centrelines as specified in this document.

6. ILLUSTRATIONS

Reference point drawings. Pages 139 to 166 show the reference points for all characters in the OCR-B character set.

7. COORDINATE TABLES

Table 5. Pages 167 to 218 contain the coordinates in microns.

Table 6. Pages 219 to 270 contain the coordinates in milli-inches.

4. REPRÉSENTATION PAR GRILLE DES CARACTÈRES

Les lignes médianes des caractères ont été conçues de manière que toutes les parties longues horizontales et verticales des caractères prennent place aisément sur une grille de 14×24 . Ceci facilite la production des caractères sur certains types de dispositifs d'impression.

5. IMPRESSION DU CARACTÈRE D'IMPRIMERIE ET DU CARACTÈRE À ÉPAISSEUR DE TRAIT CONSTANTE

Pour pouvoir imprimer le caractère d'imprimerie et obtenir l'image imprimée la plus satisfaisante, il est désirable que le dispositif d'impression soit à même d'imprimer des angles vifs et de reproduire très exactement les variations de l'épaisseur du trait. Ceci n'est pas indispensable pour imprimer le caractère à épaisseur de trait constante. Certains équipements d'impression permettent d'obtenir une épaisseur du trait dont la précision se situe entre celle requise pour l'imprimerie et celle fournie par les imprimantes rapides, par exemple. Il est laissé à la discrétion des fabricants de tels équipements de concevoir leurs caractères de manière que l'image imprimée présente, autant que possible, les variations voulues de l'épaisseur du trait, variations contribuant à donner à l'image imprimée du caractère d'imprimerie l'aspect esthétique désiré.

On s'efforcera d'obtenir une répartition symétrique de l'image imprimée des traits par rapport à la ligne médiane, comme indiqué dans le présent document.

6. ILLUSTRATIONS

Points de référence. Les pages 139 à 166 donnent les points de référence pour tous les caractères du jeu ROC-B.

7. TABLEAUX DE COORDONNÉES

Tableau 5. Les pages 167 à 218 présentent les coordonnées en microns.

Tableau 6. Les pages 219 à 270 présentent les coordonnées en milli-inches.

ANNEX

ADDITIONAL DRAWINGS

For convenience two additional kinds of drawings of the standard fonts are provided :

- black on white shapes of letterpress font characters (size II);
- outlines of constant strokewidth font characters (sizes I and II).

The latter drawings show the centreline shape, together with an outline which is the envelope of a circle, of diameter equal to the nominal strokewidth, whose centre moves along the centreline. In addition, constant strokewidth font centrelines are shown for size III.

Centreline drawings are mainly given as a guide for the production of OCR-B types for printing equipment such as typewriters.

Since this ISO Recommendation specifies the nominal printed images, type should not be cut to the dimensions given. Type dimensions should be deduced from the nominal printed image dimensions after due correction for the systematic effects in the printing process.

ANNEXE

PLANCHES SUPPLÉMENTAIRES

Pour plus de facilité, deux ensembles supplémentaires de planches du jeu normalisé sont prévus :

- en noir sur blanc pour les caractères d'imprimerie (dimension II)
- pourtour du caractère à épaisseur de trait constante (dimensions I et II).

Ces dernières représentent la ligne médiane et un pourtour qui est l'enveloppe d'un cercle dont le diamètre est égal à la valeur nominale de l'épaisseur du trait et dont le centre décrit la ligne médiane. En outre, des lignes médianes de caractères à épaisseur de trait constante sont données pour la dimension III.

Ces planches serviront de guide pour la production de caractères ROC-B pour les dispositifs d'impression tels que machines à écrire.

La présente Recommandation ISO définissant les images imprimées nominales, les caractères d'impression ne sauraient être produits selon ces dimensions. Les dimensions exactes de ces caractères doivent être déduites de celles des images imprimées en tenant compte des effets systématiques de déformation au cours du processus d'impression.
